Subject: Microsoft Settlement

I understand that a settlement had been reached with Microsoft as a result of the long trail, but that competitors are still wanting to go further. I cannot see it. I switched recently from Netscape Navigator to Internet Explorer because I found that IE is BETTER.

I received Netscape navigator years ago, FREE, to use. I see no difference for Microsoft to give IE free than Netscape giving it away.

This foolishness has cost everybody a lot of money already. Don't prolong it.
